CompTIA
(12) Weeks – Tuition $2,200

Network+

Program Overview: A CompTIA Network+ certification demonstrates a student's technical abilities for networking administration and support and validates their knowledge of media and topologies, protocols and standards, network implementation, and network support.

Target Audience: The CompTIA Network+ certification is for any individual with 9 months or more networking experience who would like to pursue a career as a network administrator or engineer.

Prerequisites: No prerequisites are required to take the CompTIA Network+ exam. However, candidates are recommended to have the CompTIA A+ certification or equivalent knowledge before taking this exam.

Requirements: Students must pass the following exam requirements to attain the CompTIA Net+ credential.

The exam covers network technologies, installation and configuration, media and topologies, management, and security. Candidate job roles include network administrator, network technician, network installer, help desk technician and IT cable installer.

Companies such as Dell, HP, Ricoh, Sharp and Xerox recommend or require CompTIA Network+ for their networking technicians. It is a technical prerequisite option for IT technicians seeking to join the Apple Consultants Network, and is recognized by the U.S. Department of Defense.

The current version of CompTIA Network+, exam code N10-005, was released Dec. 1, 2011. The revised objectives address virtual networking and give increased attention to network security and coverage of the seven-layer OSI (Open System Interconnection) model.

CompTIA is an ANSI accredited Certifier - 0731. The CompTIA Network+ce program is included in the scope of this accreditation. The CompTIA Network+ certification may be kept current through the CompTIA Continuing Education program.
